# **Commodity EXIM Report**

## **DGCI&S, ITJ Division**

1. The weekly EXIM Report published by ITJ Division of DGCI&S, Kolkata presents some basic insights into India's export and import trade patterns with respect to selected set of commodities identified each week in order to facilitate preliminary commodity group/sector specific analysis for informed trade decision making.
2. For both categories of trade, one commodity group is chosen from the entire ITC-HS 4-digit Classification (2023-24 classification system). The Indian Trade Classification based on Harmonized System has been adopted in India for recording export and import. While India specific data is sourced from DGCI&S, M/o C & I database, global export-import data of exactly those sets of commodities are sourced from UN-Comtrade database.
3. With regards to the selected time-period, this report outlines trade statistics over a period of four years, i.e., 2020-21 to 2023-24. The latest finalized data available on the UN Comtrade database are only up to year 2023 (Calendar Year) and on the DGCI&S database up to February, 2025. So, for each commodity group dealt with in this report, trends from 2020 to 2023 have been shown where data have been sourced from UN Comtrade and from 2020-21 to 2023-24 when sourced from DGCI&S database.
4. In the current report [3rd weekly Commodity EXIM report of May, 2025 dated 21<sup>st</sup> May, 2025] the following two commodities have been dealt with:

**Export: Cotton, Not Carded or Combed [ITCHS Code –5201]** - In financial year 2023-24 this commodity group had 0.22% share in India's total export value as per DGCI&S database. India had occupied the 4<sup>th</sup> slot in export of this commodity (755.66 million USD) with 4.69% share of total global export in the year 2023.

**Import: Diamonds, Whether or Not Worked, But Not Mounted or Set [ITCHS Code – 7102]** – In financial year 2023-24 (April 2023 – March, 2024) this commodity group had share of 3.20% in India's total import value as per DGCI&S database. India having 20.30% share (21983.45 million USD) of total global import of this commodity occupied the top slot in the world in 2023.
