For other contracts, if not satisfied by the decision in adjudication, or if the adjudicator fails to notify his decision within the above-mentioned time-frame, the contractor may proceed to invoke the process of Mediation as follows:

Mediation

- (i) Any party may invoke Mediation by submitting "Notice of Mediation" to the CMD of concerned Subsidiary / CIL. A neutral third party, known as the Mediator, facilitates the mediation process.
- (ii) **The Mediation Act and a Mediation Agreement:** The Mediation shall be conducted as per The Mediation Act 2023.
- (iii) **Guidelines for Mediation:** Department of Expenditure, Ministry of Finance has issued guideline on Mediation. Government departments/ entities/ agencies are encouraged to adopt mediation under the Mediation Act 2023 and/ or negotiate amicable settlements to resolve disputes. Where necessary, e.g. matters of high value, they may proceed in the manner discussed below:
 1. Company, may where they consider appropriate, e.g. in high-value matters (where amount of dispute / claim value is more than the DoP of concerned Director), constitute a High-Level Committee (HLC) (minimum 03 members) for dispute resolution, which may include the following (this composition is purely indicative and not prescriptive):
 - i. A retired judge.
 - ii. A retired high-ranking officer and/ or technical expert.
 2. In cases where a HLC is constituted, the Company may either
 - i. negotiate directly with the other party and place a tentative proposed solution before the HLC or
 - ii. conduct mediation through a mediator and then place the tentative mediated agreement before the HLC or
 - iii. use the HLC itself as the mediator.
 3. This will enable decisions taken for resolving disputes in appropriate matters to be scrutinized by a high-ranking body at arms-length from the regular decision-making structure, thereby promoting fair and sound decisions in the public interest, with probity.
 4. There may be rare situations in long-duration works contracts where a renegotiation of the terms may best serve public interest due to unforeseen major events. In such circumstances, the terms of the tentative re-

negotiated contract may be placed before a suitably constituted High-Level Committee before approval by the competent authority.

5. Disputes where the methods outlined above are unsuccessful should be adjudicated by the courts.

(iv) Appointment of Mediator(s):

1. Mediators can be of any nationality and must be registered with the Mediation Council of India (MCI) or empanelled by a court-annexed mediation centre or empanelled by an Authority constituted under the Legal Services Authorities Act, 1987 or empanelled by a mediation service provider (MSP) recognised by MCI.
2. Within 30 days of receipt of the "Notice of Mediation", the CMD of subsidiary / CIL after consultation with concerned Legal department shall propose names of three likely mediators from its panel, asking the other party to choose one as Mediator. The mutually accepted mediator shall then be appointed to conduct mediation.
3. If parties do not agree on the mediator, they can approach a mediation service provider ("MSP", recognised by MCI), who shall appoint a mediator based on the suitability and preferences of the parties within 7 days.
4. In contracts having an Integrity Pact, Independent External Monitors (IEMs) can be appointed as mediators, as per the Standard Operating Procedure (SOP) issued by the Central Vigilance Commission (CVC).
5. After a mediator is appointed, they must disclose any conflict of interest. Either party can seek a replacement of the Mediator after such disclosure.

(v) Venue: Mediation must be conducted within the territorial jurisdiction of the Court, which has jurisdiction to decide the dispute unless both parties agree to do it online or at the HQ of the subsidiary / CIL where the contract has been executed.

Online Mediation: The Act allows parties to opt for online/ virtual Mediation, which shall be deemed to occur within the jurisdiction of a competent court. The Act also requires online mediation communication mechanisms to ensure confidentiality.

(vi) The Process:

1. The Mediator independently and impartially encourages open communication and cooperation between disputing parties to reach an amicable settlement, but he does not have the authority to impose a settlement upon the parties to the dispute. The parties shall be informed expressly by the mediator that he only facilitates in arriving at a resolution of the dispute and that he shall not impose any settlement nor give any assurance that the mediation may result in a settlement.
2. Unlike court proceedings, Mediation is informal and flexible and allows for creative problem-solving and exploration of various solutions. The Code of Civil Procedure or the Indian Evidence Act, 1872 shall not be binding on the mediator.
3. Confidentiality: Subject to the other provisions of the Mediation Act 2023, the mediator, mediation service provider, the parties and participants in the mediation shall keep confidential all the following matters relating to the mediation proceedings, namely:—
 - i. acknowledgements, opinions, suggestions, promises, proposals, apologies and admissions made during the mediation;
 - ii. acceptance of, or willingness to, accept proposals made or exchanged in the mediation;
 - iii. documents prepared solely for the conduct of mediation or in relation thereto;
 - iv. any other mediation communication.
- v. No audio or video recording of the mediation proceedings shall be made or maintained by the parties or the participants, including the mediator and mediation service provider, whether conducted in person or online, to ensure the confidentiality of the mediation proceedings.
4. The mediator initially meets the parties separately and communicates the view of each party to the other to the extent agreed upon by them. He assists them in identifying issues, advancing better understanding, clarifying priorities, and exploring areas of the parties' responsibility, identifying common interests, and encouraging compromise. He then meets them jointly to encourage a mutually acceptable resolution. At any stage of the mediation proceedings, at the parties' request, the mediator may suggest a dispute settlement in writing.

(vii) Termination of Mediation: The process must be completed within 120 days, though parties can extend it by

another 60 days through mutual consent. If Mediation is not completed within this timeline (120+60 days), the Mediator shall prepare a non- settlement report without disclosing the cause of non-settlement or any other matter or thing referring to their conduct during mediation for the parties or the MSP. Mediation shall also stand terminated on a declaration of the mediator, after consultation with the parties or otherwise, that further efforts at mediation are no longer justified or on communication by party(ies) in writing, addressed to the mediator and the other parties that they wish to opt out of mediation.

(viii) Mediated Settlement Agreement (MSA):

As per Section 49 of Mediation Act, Notwithstanding anything contained in this Act, no dispute including a commercial dispute, wherein the Central Government or State Government or any of its agencies, public bodies, corporations and local bodies including entities controlled or owned by them is a party, the settlement agreement arrived at shall be signed only after obtaining the prior written consent of the competent authority of such Government or any of its entity or agencies, public bodies, corporations and local bodies, as the case may be.

If the parties resolve the dispute and execute a mediated settlement agreement ("MSA"), then the Mediation is successful. An MSA is a written agreement settling some or all disputes and may extend beyond the disputes referred to mediation. It must be valid under the Indian Contract Act, signed by both parties and duly authenticated by the Mediator for the parties or the MSP. The Act provides options for MSA registration. During the pendency of proceedings, parties can also execute other agreements, settling some of the subject- matter disputes.

1. **Challenge to MSA:** MSA can be challenged within 90 days on limited grounds of (a) fraud, (b) corruption, (c) impersonation, and (d) subject matter being unfit for Mediation.
2. **Execution of MSA:** If there is no challenge or a challenge is unsuccessful, the Act ensures that the MSA is binding and enforceable, akin to a judgment or decree. This means that if one party fails to comply with the MSA, the non-defaulting party has a right to enforce it through the Court.
3. **Costs:** The parties shall equally bear all costs of mediation, including the fees of the mediator and the charges of the mediation service provider.
4. **No claim of Interest during Mediation proceedings:** Parties shall not claim any interest on claims/counter-claims from the date of notice invoking Mediation till the execution of the settlement agreement if so arrived. If parties cannot resolve the dispute, either party shall claim no interest from the date of notice invoking Mediation until the date of Termination of Mediation Proceedings.
5. The parties shall not initiate, during the mediation proceedings, any arbitral or judicial proceedings in respect of a dispute that is the subject matter of the mediation proceedings.

SPECIAL TERMS & CONDITIONS(STC)

The following Special terms & conditions are also acceptable to the company. The Bidders are requested not to quote any additional conditions in their tender.

1.0. PRICE VARIATION CLAUSE

The quoted price shall remain firm & final for the period stipulated for completion of the work, except the escalation/de-escalation on account of increase/ decrease in the price of POL as per provision given at sl. no. 1.3, 1.4 & 1.5 (only POL component).

In case the work is not completed during the stipulated period due to Force Majeure Condition and/ or delay in statutory Clearance(s) viz. (i) Notification under Section 4 (i) of CBA Act, 1957 & (ii) Permission for exploration in Forest Areas; one time escalation/de-escalation of contract price to the tune of 50% on account of increase/ decrease in the price of wages of labour and materials required for execution of work will be applicable as per provision given at sl. no. 1.1, 1.2, 1.4 & 1.5 (only labour & Material components). The said one time escalation/de-escalation of the contract price on account of wages of labour & Material components would be applicable for the extended contract period, which will not be more than the original contract period. However, the escalation/de-escalation on account of increase/ decrease in the price of POL will continue as per the above stipulation for the entire contractual period.

- a) The amount of the contract shall accordingly be varied, subject to the condition that such compensation for variation in prices shall be available only for the work done during the contractual period including such period for which the contract is validly extended under the provisions of the contract without any penal action.
- b) The base date for working out such price variation shall be the last date on which the price bids are stipulated to be received.
- c) The compensation of price variation for POL shall be worked out at quarterly intervals and shall be with respect to the cost of actual work done during the previous three months. The first such payment shall be made at the end of three months after the month (excluding) in which the tender was accepted and thereafter at three months' interval.

Simple average of the rates of diesel prevailing at same reference place in a period shall be taken as the rate of diesel for calculation of diesel escalation/de-escalation for that period of work.

- d) If the contract is to be extended beyond the stipulated period for completion of the work due to fault on the part of the Contractor, escalation on prices shall not be allowed further and the prevailing contract price will continue for completion of the work, consequently clause 6.0 of the General Terms & Condition will be applicable.

1.1. PRICE VARIATION FOR LABOUR

The amount paid to the contractor for the work done shall be adjusted for increase or decrease in the cost of labour and the cost shall be calculated as per aforesaid provision in accordance with the following formula:

$$VL = W \times \frac{A}{100} \times \frac{L - L_o}{L_o} \times \frac{50}{100}$$

Where:

- VL = Variation in labour cost i.e. increase or decrease in the amount in rupees to be paid or recovered.
- W = Value of work done during the period under reckoning to which the price variation relates as indicated in clause no. 1.4 of this section.
- A = Component of labour expressed as percentage of the total value of work adopted from Table-1 of this section.
- L_o = Minimum wages for unskilled workers payable as per the Minimum Wages Act / Rules of the State or Central Government, whichever is more, applicable to the place of work as on the last date stipulated for receipt of the Price bids or Revised Price bids whichever is later.
- L = Revised minimum wages of unskilled workers on the date of completion of initial contract period.

1.2. PRICE VARIATION ON MATERIALS

The amount to be paid to the contractor for the work done shall be adjusted for increase or decrease in the cost of materials and the cost shall be calculated as per aforesaid provision in accordance with the following formula:

$$V_m = W \times \frac{B}{100} \times \frac{M - M_o}{M_o} \times \frac{50}{100}$$

Where:

- V_m = Variation in material cost i.e. increase or decrease in the amount in rupees to be paid or recovered.
- W = Value of work done during the period under reckoning to which the price variation relates as indicated in clause no. 1.4 of this section.
- B = Component of material expressed as percentage of the total value of work adopted from Table-1 of this section.
- M_o = All India Wholesale Price Index for all commodities as published by the RBI Bulletin, Ministry of Industry & Commerce, Govt. Of India, relating to the last date on which the price bids or revised price bids whichever is later was stipulated to be received.
- M = All India Wholesale Price Index for all commodities as published by the RBI Bulletin, Ministry of Industry & Commerce, Govt. Of India on the date of completion of initial contract period.

1.3. PRICE VARIATION ON POL

The amount to be paid to the contractor for the work done shall be adjusted for increase or decrease in the cost of POL and the cost shall be calculated as per aforesaid provision in accordance with the following formula:

$$V_f = W \times \frac{C}{100} \times \frac{F - F_o}{F_o}$$

Where:

- V_f = Variation in the cost of fuel, oil and lubricants i.e. increase or decrease in the amount in rupees to be paid or recovered.
- W = Value of work done during the period under reckoning to which the price variation relates as indicated in clause no. 1.4 of this section.
- C = Component of POL expressed as percentage of the total value of work adopted from Table-1 of this section.
- F_o = Index Number for Wholesale Price for the group of "Fuel, power, light and lubricants" as published by the Economic Advisor, Ministry of Industry, Govt. Of India prevalent on the last date of receipt of price bids or revised price bids whichever is later.
- F = Average Index Number for Wholesale Price for the group of "Fuel, power, light and lubricants" as published by the Economic Advisor, Ministry of Industry, Govt. of India for the period to which escalation/ de-escalation relates.

1.4. WHILE CALCULATING THE VALUE OF "W" THE FOLLOWING SHALL BE NOTED

The cost on which the escalation/price variation shall be payable shall be reckoned as 85% of the cost of work as per the bills to which escalation relates, and from this amount the value of materials supplied or services rendered at the prescribed charges under the relevant provisions of the contract, and proposed to be recovered in the particular bill, shall be deducted before the amount of compensation for escalation/price variation is worked out. In the case of materials brought to site for which any secured advance is included in the bill, the full value of such materials as assessed by the Project Manager/PRCO (and not the reduced amount for which secured advance has been paid) shall be included in the cost of work done for operation of this clause. Similarly when such materials are incorporated in the work and the secured advance is deducted from the bill, the full assessed value of the materials originally considered for operation of this clause should be deducted from the cost of the work shown in the bill, running or final. Further the cost shall not include any work for which payment is made at prevailing market rates.

- 1.5. In the event the price of materials and/ or wages of labour required for execution of the work decreases, there shall be downward adjustment of the cost of work so that such price of materials and/or wages of labour shall be deductible from the cost of work under this contract and in this regard the formulae hereinbefore stated under this clause shall mutatis/mutandis apply.

Table-1: Value of A, B & C in the Price variation formula

A (Labour Component)	B (Material Component)	C (POL Component)
55	35	10

The price variation clause as stated above will be applied for extended time frame of a contract by following the principles as under:

- i) Normally, if and when it is understood that a contract is not going to be completed within the scheduled time period, the contract is kept operative by extending the time of completion provisionally. During this provisional extended period the operation of the Price Variation Clause will remain suspended.
- ii) If and when it is decided at the end of the successful completion of the work that the delay was due to causes not attributable to the contractor, then the Price Variation Clause will be revived and applied as if the scheduled date of completion has been shifted to the approved extended date.
- iii) If it is decided at the end of successful completion of the work that the delay was due to the fault of the Contractor then the Price Variation Clause will not be revived and no payment will be made to the contractor on this account. Additionally the Clause related to Compensation for delay will be applied.
- iv) In some cases the total delay may be partially due to causes not attributable to the Contractor and partially due to his fault. It may be difficult to exactly quantify the total delay proportionately in such cases. The Price Variation Clause under such condition will be made operative for the entire extended time period by freezing the relevant indices on the date of the scheduled date of completion as originally fixed in the contract/ agreement. At the same time the Clause related to the compensation for delay will also be applied.

Code of Code of Integrity for Public Procurement (CIPP)

1. Introduction

Public procurement is perceived to be prone to corruption and ethical risks. To mitigate this, the officials of Procuring Entities involved in procurement and the bidders/ contractors must abide by the following Code of Integrity for Public Procurement (CIPP). The bidders/ contractors should accept a declaration about abiding by a Code of Integrity for Public Procurement (including sub-contractors engaged by them) during submission of bid, with a warning that, in case of any transgression of this code, it would be liable for punitive actions such as cancellation of contracts, banning and blacklisting or action in Competition Commission of India, and so on.

2. Code of Integrity for Public Procurement

Procuring authorities as well as bidders, contractors and consultants should observe the highest standard of ethics and should not indulge in the following prohibited practices, either directly or indirectly, at any stage during the procurement process or during execution of resultant contracts:

- i) **“Corrupt practice”**: making offers, solicitation or acceptance of bribe, rewards or gifts or any material benefit, in exchange for an unfair advantage in the procurement process or to otherwise influence the procurement process or contract execution;
- ii) **“Fraudulent practice”**: any omission or misrepresentation that may mislead or attempt to mislead so that financial or other benefits may be obtained or an obligation avoided. This includes making false declaration or providing false information for participation in a tender process or to secure a contract or in execution of the contract;
- iii) **“Anti-competitive practice”**: any collusion, bid rigging or anti-competitive arrangement, or any other practice coming under the purview of The Competition Act, 2002, between two or more bidders, with or without the knowledge of the procuring entity, that may impair the transparency, fairness and the progress of the procurement process or to establish bid prices at artificial, non-competitive levels;
- iv) **“Coercive practice”**: harming or threatening to harm, persons or their property to influence their participation in the procurement process or affect the execution of a contract;
- v) **“Conflict of interest”**:

Participation by a bidding firm or any of its affiliates that are either involved in the consultancy contract to which this procurement is linked; or if they are part of more than one bid in the procurement; or if the bidding firm or their personnel have relationships or financial or business transactions with any official of procuring entity who are directly related to tender or execution process of contract; or improper use of information obtained by the (prospective) bidder from the procuring entity with an intent to gain unfair advantage in the procurement process or for personal gain.

All such Bidders having a Conflict of Interest, shall be disqualified.

Earnest Money deposited by such defaulting Bidders shall be forfeited and they shall be debarred from participating in future tenders in concerned Subsidiary/CIL HQ for a minimum period of 12(twelve) months from the date of issue of such letter. In case of JV/Consortium/Partnership firm, the debarment shall also be applicable to all individual partners of JV/Consortium/Partnership firm and in case of Company then only the Company shall be debarred.

Note: - However, debarment shall be done as per Guidelines on Debarment of firms from Bidding.

- vi) **“Obstructive practice”**: materially impede the procuring entity’s investigation into allegations of one or more of the above **mentioned** prohibited practices either by deliberately destroying, falsifying, altering; or by concealing of evidence material to the investigation; or by making false statements to investigators and/ or by threatening, harassing or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation; or by impeding the procuring entity’s rights of audit or access to information;

3. Obligations for Proactive Disclosures

Failure to do so would amount to violation of this code of integrity; and

- ii) Any bidder must declare, whether asked or not in a bid document, any previous transgressions of such a code of integrity with any entity in any country during the last three years or of being debarred by any other procuring entity. Failure to do so would amount to violation of this code of integrity.
- iii) To encourage voluntary disclosures, such declarations would not mean automatic disqualification for the bidder making such declarations. The declared conflict of interest may be evaluated and mitigation steps, if possible, may be taken by the procuring entity. Similarly voluntary reporting of previous transgressions of Code of Integrity elsewhere may be evaluated and barring cases of various grades of debarment, an alert watch may be kept on the bidder's actions in the tender and subsequent contract.

4. Punitive Provisions

Without prejudice to and in addition to the rights of the procuring entity to other penal provisions as per the bid documents or contract, if the procuring entity comes to a conclusion that a (prospective) bidder/ contractor directly or through an agent, has violated this code of integrity in competing for the contract or in executing a contract, the procuring entity may take appropriate measures including one or more of the following:

SCHEME FOR DETAILED EXPLORATION IN
DIPSIDE OF GONDEGAON GHATROHAN (CIL) BLOCK,
KAMPTEE COALFIELD, DISTRICT -NAGPUR, MAHARASHTRA

1.0.0 INTRODUCTION

- 1.1.1 Kamptee Coalfield is located in Nagpur district of Maharashtra State and is bounded by Latitude 21° 0' N and 21° 30' N and Longitude 78° 45' E and 79° 16' E. The Kamptee coalfield is situated around 20 Km. North of Nagpur City.
- 1.1.2 The Kamptee coalfield is a horseshoe shaped master basin aligned in NW-SE direction covering an area of about 605 sq. km. Since the western and southern boundaries of this coalfield are obscured by Deccan traps, continuity of the coalfield beyond the presently known limits is not predictable. The coalfield is entirely concealed under a thick cover of detrital mantle. The Kamptee Coalfield is constituted of four sub-basins viz. Kamptee-Sillewara-Patansaongi Sub-basin, Saoner Sub-basin, Dhapewada-Bokhara Sub-basin and Hingna-Bazargaon Sub-basin each of which shows independent characteristic structural behavior.
- 1.1.3 The first two sub-basins are separated by a metamorphic high around Mahadulla-Koradi area near Koradi Thermal power Station. Another metamorphic high separates the Kamptee-Silewara-Patansaongi sub-basin from Saoner-Bharatwada sub-basin exposing Talchirs directly below the detrital mantle between the two sub-basins. Further, the Saoner-Bharatwada Sub Basin is separated from the Hingna-Bazargaon Sub Basin by metamorphics occurring at shallow depths below the Deccan Trap.
- 1.1.4 **PREVIOUS WORK**
Following geological reports/notes has been prepared documenting the data of GondEGAON-Ghatrohan and Inder Blocks:
- i) Preliminary Geological report on Inder GondEGAON sector of Kamptee colliery, CMAL, Oct 1974,

- ii) GR on exploration for coal Gondegaon Ghatrohan Block (MECL), APR.1988,
- iii) Geological appraisal quarriable potentiality in Inder colliery leasehold (CMPDI), AUG.1986
- iv) Geological note on part of Gondegaon -Ghatrohan Block, (CMPDI), MAR. 1998,
- v) Geological Note on production support drilling in Inder Colliery (CMPDI), Jan 2005,
- vi) Geological Note on production support drilling in Inder Colliery (U.G. to O.C.) (CMPDI), Dec. 2006.

1.1.5 Based on the data above mentioned reports/notes and boreholes drilled by CMPDI in the dip side, an area of approximately 5.9 Sq. km. has been identified for detailed exploration by drilling 27 boreholes (by outsourcing agency) and 21.5 line Km of 2-D Seismic survey (departmental).

1.1.6 **LOCATION & ACCESSIBILITY**

Proposed area is part of Gondegaon- Ghatrohan (CIL) block. The Gondegaon-Ghatrohan Block is a part of the Kamptee- Silewara- Patansaongi Sub-basin. The area falls in the Nagpur district of Maharashtra state and can be approached from Nagpur by National Highway No.44 and then by NH 247 via Kamptee Road or through NH 44 and after crossing the river Kanhan, and then taking road leading towards Gondegaon-Inder Mines of WCL via Tekadi and then proceed to Juni Kamptee to reach the interior of the block. The nearest rail head is Kanhan Junction of the south-eastern railway on the Mumbai-Howrah main line located at 5 km. from the block.

1.1.7 **GEOLOGY & STURUCTURE**

A generalized sequence of different formations in Kamptee Coalfield is given in the following table.

Table: Geological Succession of the Kamptee Coalfield

Age	Formation	Thickness (m) From-To		Lithology
Recent to Sub-Recent	Alluvium	1.0	53.20	Black cotton soil and sandy soil with pebbles
Eocene to Cretaceous	Deccan Trap	0.25	65.30	Basaltic lava
Cretaceous	Lametas	0.85	25.95	Cherty limestone and sandstone
-----Unconformity-----				
Upper Permian	Kamthis	0.00	149.30	Brown coloured medium to coarse grained ferruginous sandstone and clay
-----Unconformity-----				
Middle Permian	Moturs	1.22	300.00	Variegated clay, chloritic sandstone with occasional shale bands (Full thickness not determined).
Lower Permian	Barakars	15.35	284.40	Fine to coarse grained sandstone with shale, carb. Shale and coal seams
Upper Carboniferous	Talchir	3.75	117.80	Greenish shale/Siltstones
-----Unconformity-----				
Archaeans	Metamorphics			Gneisses and Schists

The area is mostly under the cover of black cotton soil/sandy soil. The geological succession of area, as worked out from the sub-surface data of boreholes drilled in the up-dip side are along with thickness ranges are given in following table:

Table: Geological Succession of the Gondegaon- Ghatrohan block

Formation	Lithology	Thickness range (m)	
		Minimum	Maximum
Soil/weathered zone	Sandy soil with black cotton soil with loose pebbles, boulders	3.00	24.00
		(MKG-4)	(CMKG-16)
Kamthi	Friable Reddish coloured coarse grained sandstone with shale bands	0.87	46.5
		(CMKG-30)	(MKG-10)
Motur	Variegated clay, chloritic sandstone with occasional shale bands (Full thickness not determined).	1.22	300.00
Barakar	White medium to coarse grained sandstone with coal seam, carb. shale, shaly coal & sandy shale & shale intercalated at places	14.44	150.1
		(CMKG-15)	(CMKG-19)

Formation	Lithology	Thickness range (m)	
		Minimum	Maximum
Talchir	Greenish shale & sandstone	3.00	4.00
		(CMKG-25)	(CMKG-26)

The Gondegaon-Ghatrohan Block is a part of the Kamptee- Silewara-Patansaongi Sub-basin. Geological structure has been deciphered mainly on the basis of subsurface data of boreholes and keeping regional geological setting in mind and utilizing geological structure of adjacent blocks, tentative geological structure has been prepared (Plate I-floor contour plan of seam II bottom).

The general strike of beds is ESE-WNW to NW-SE. The gradient of the coal seams varies from 1 in 3.5 to 1 in 5 due SW to SSW.

Only few boreholes have been drilled in the proposed area and out of those, and fewer boreholes could be drilled up to seam II Bottom, hence geological structure has been drawn with the help of data of boreholes drilled in up-dip side of the proposed area. In the view of these limitations, geological structure as presented in the floor contour plan of Seam II Bottom (plate I), is tentative.

As noted from tentative structure, faults have been interpreted based on the difference in FRL on both sides, omission and reduction in seam thickness, etc. The strike of the beds is mostly NW-SE with local variations and swings and the strata is dipping towards southwest with dip amount of ~6.5 degrees to 15.8 degrees (gradient 1 in 8.7 to 1 in 3.6 approx.). Normal gravity faults have been deciphered based on the subsurface data and are presumed to be pre-Kamthi faults.

1.1.8 COAL SEAMS

Five coal seams which are characteristic of Kamptee Coalfield, are present in the Gondegaon-Ghatrohan block also. All these seams occur in the Middle Barakar horizon of about 100 m thickness. The seams in Kamptee Coalfield are numbered from bottom to top, the bottom-most Seam-I is the oldest, while the Seam-V, the youngest. The oldest Seam-I is found to be deposited around 100 m above the Talchir-Barakar contact. Of the five seams, Seams-II, III & IV occur in 2 to 3 split sections, while Seam-V is present as a single horizon. Seam-I is impersistent and also thin, mostly below 0.90 m thickness. Some carbonaceous bands other than these sections have also been intersected in the boreholes.

In Inder Colliery leasehold topmost seam is numbered as Seam-I and so on as per Colliery nomenclature. However, as per CMPDI nomenclature, Seam-V is the top

most seam. The sequence of coal seam-sections in both nomenclature, nature of parting, range of thickness, etc. is given in the following table:

Nomenclature of coal seams		Range of thickness (m)
As Per CMPDI	As Per Colliery	
Seam-V	Seam-I	8.08-15.68
Parting		22.89-35.35
Seam-IV (Top)	Seam-II	2.40-5.34
Parting		0.41-6.42
Seam-IV (Bottom)	Seam-III	6.49-8.38
Parting		1.96-24.38
Seam-III (Top)	Seam-IVA	0.90-3.53
Parting		1.83-8.77
Seam-III (Bottom)	Seam-IV B	2.12-5.15
Parting		2.74-19.5
Seam-II (Top)	Seam-VA	1.31-5.08
Parting		1.16-10.85
Seam-II (Bottom)	Seam-VB	1.35-3.46

The sequence of coal seams/sections with floor depth, thickness range are given in Annexure I.

1.1.9 QUALITY OF COAL SEAMS

The coal of high moisture, medium & fairly high ash and are of non-coking type. The grade varies from B to G (GCV Bands G6-G15).

1.1.10 RESERVES

In the proposed block area, approximate 100MT of coal resource may be available considering continuity of seams in the dip side area as available in Gondegaon block.

1.1.11 DETAILED EXPLORATION SCHEME

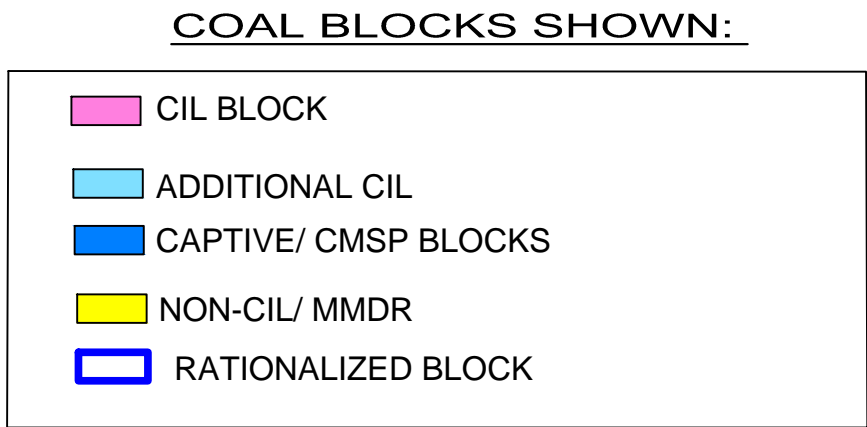

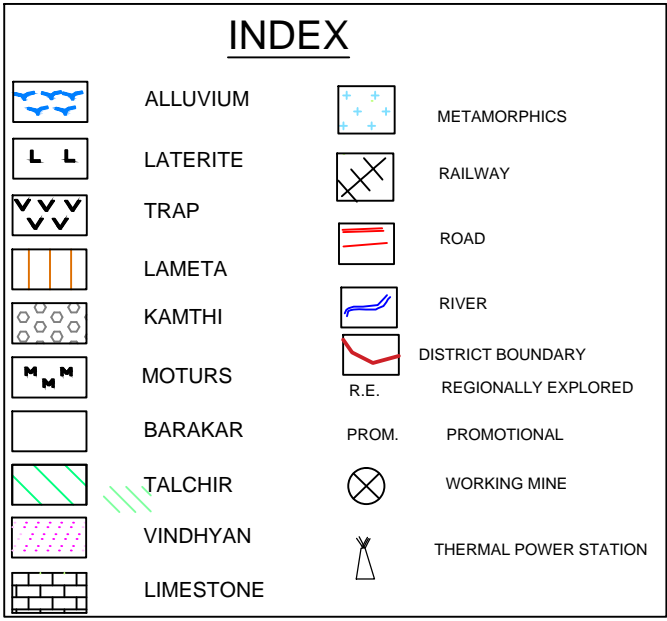

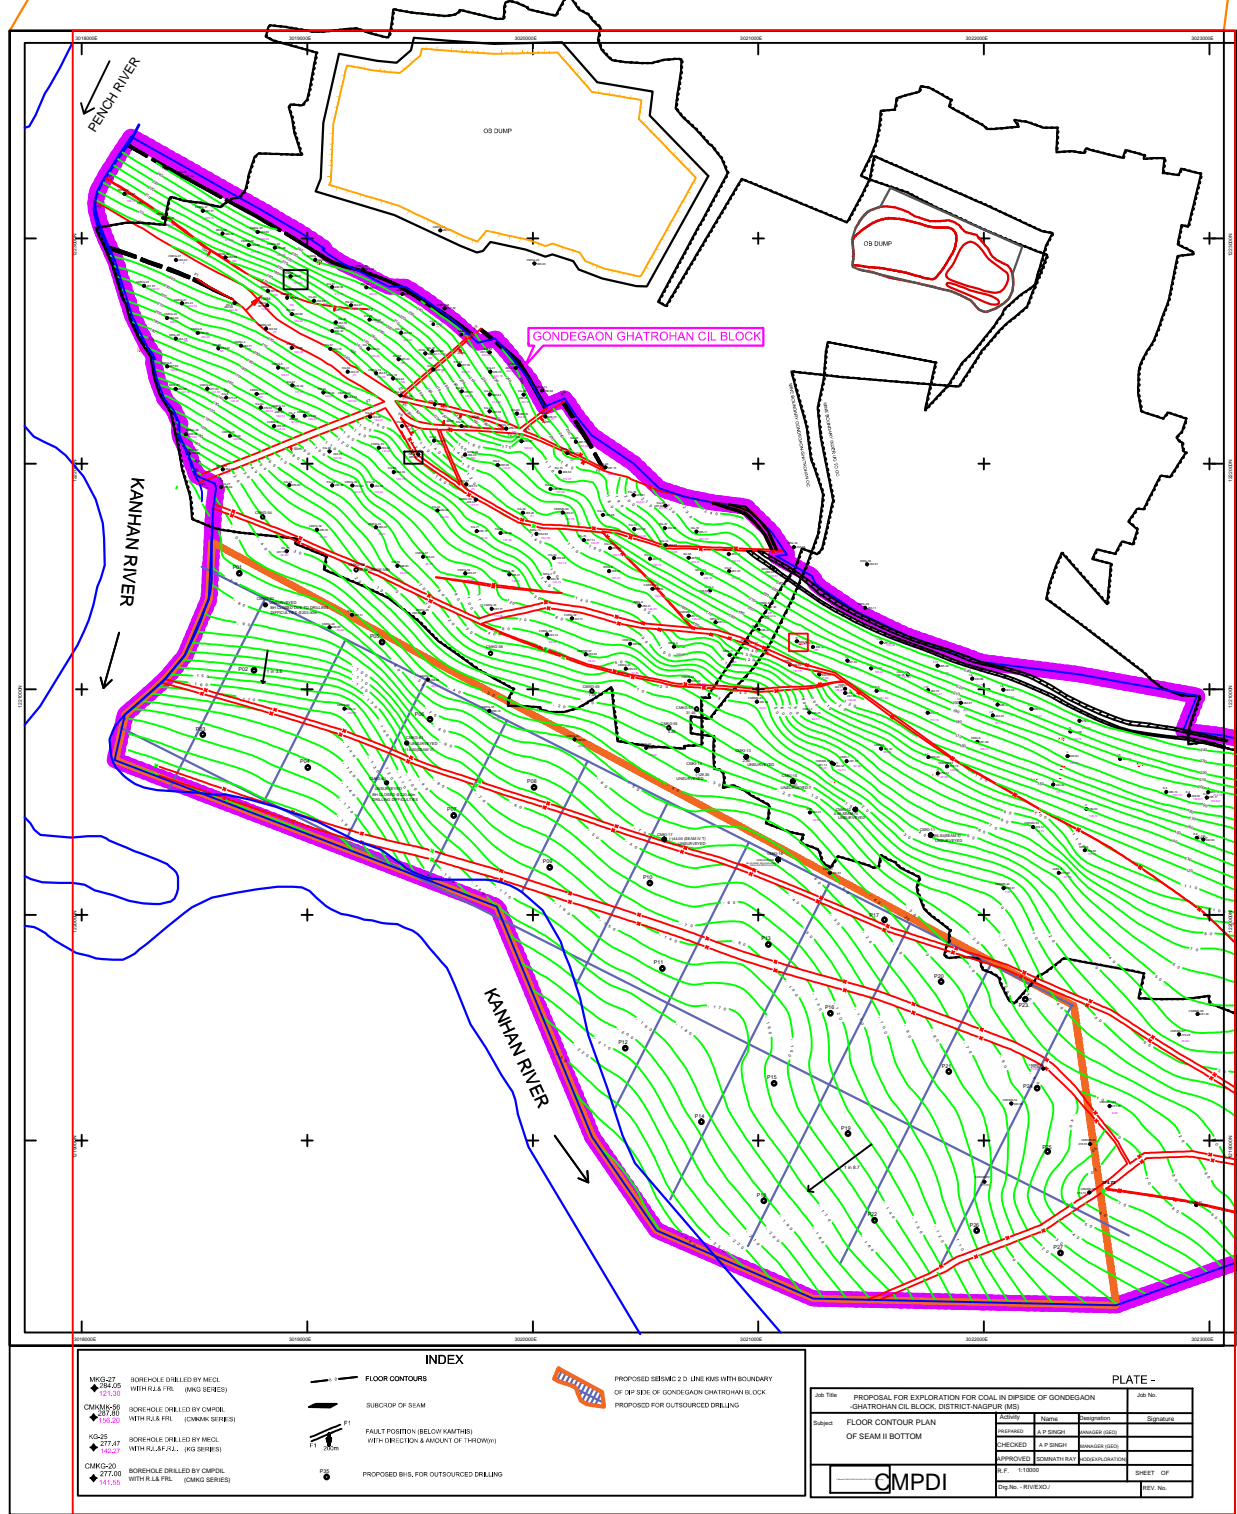

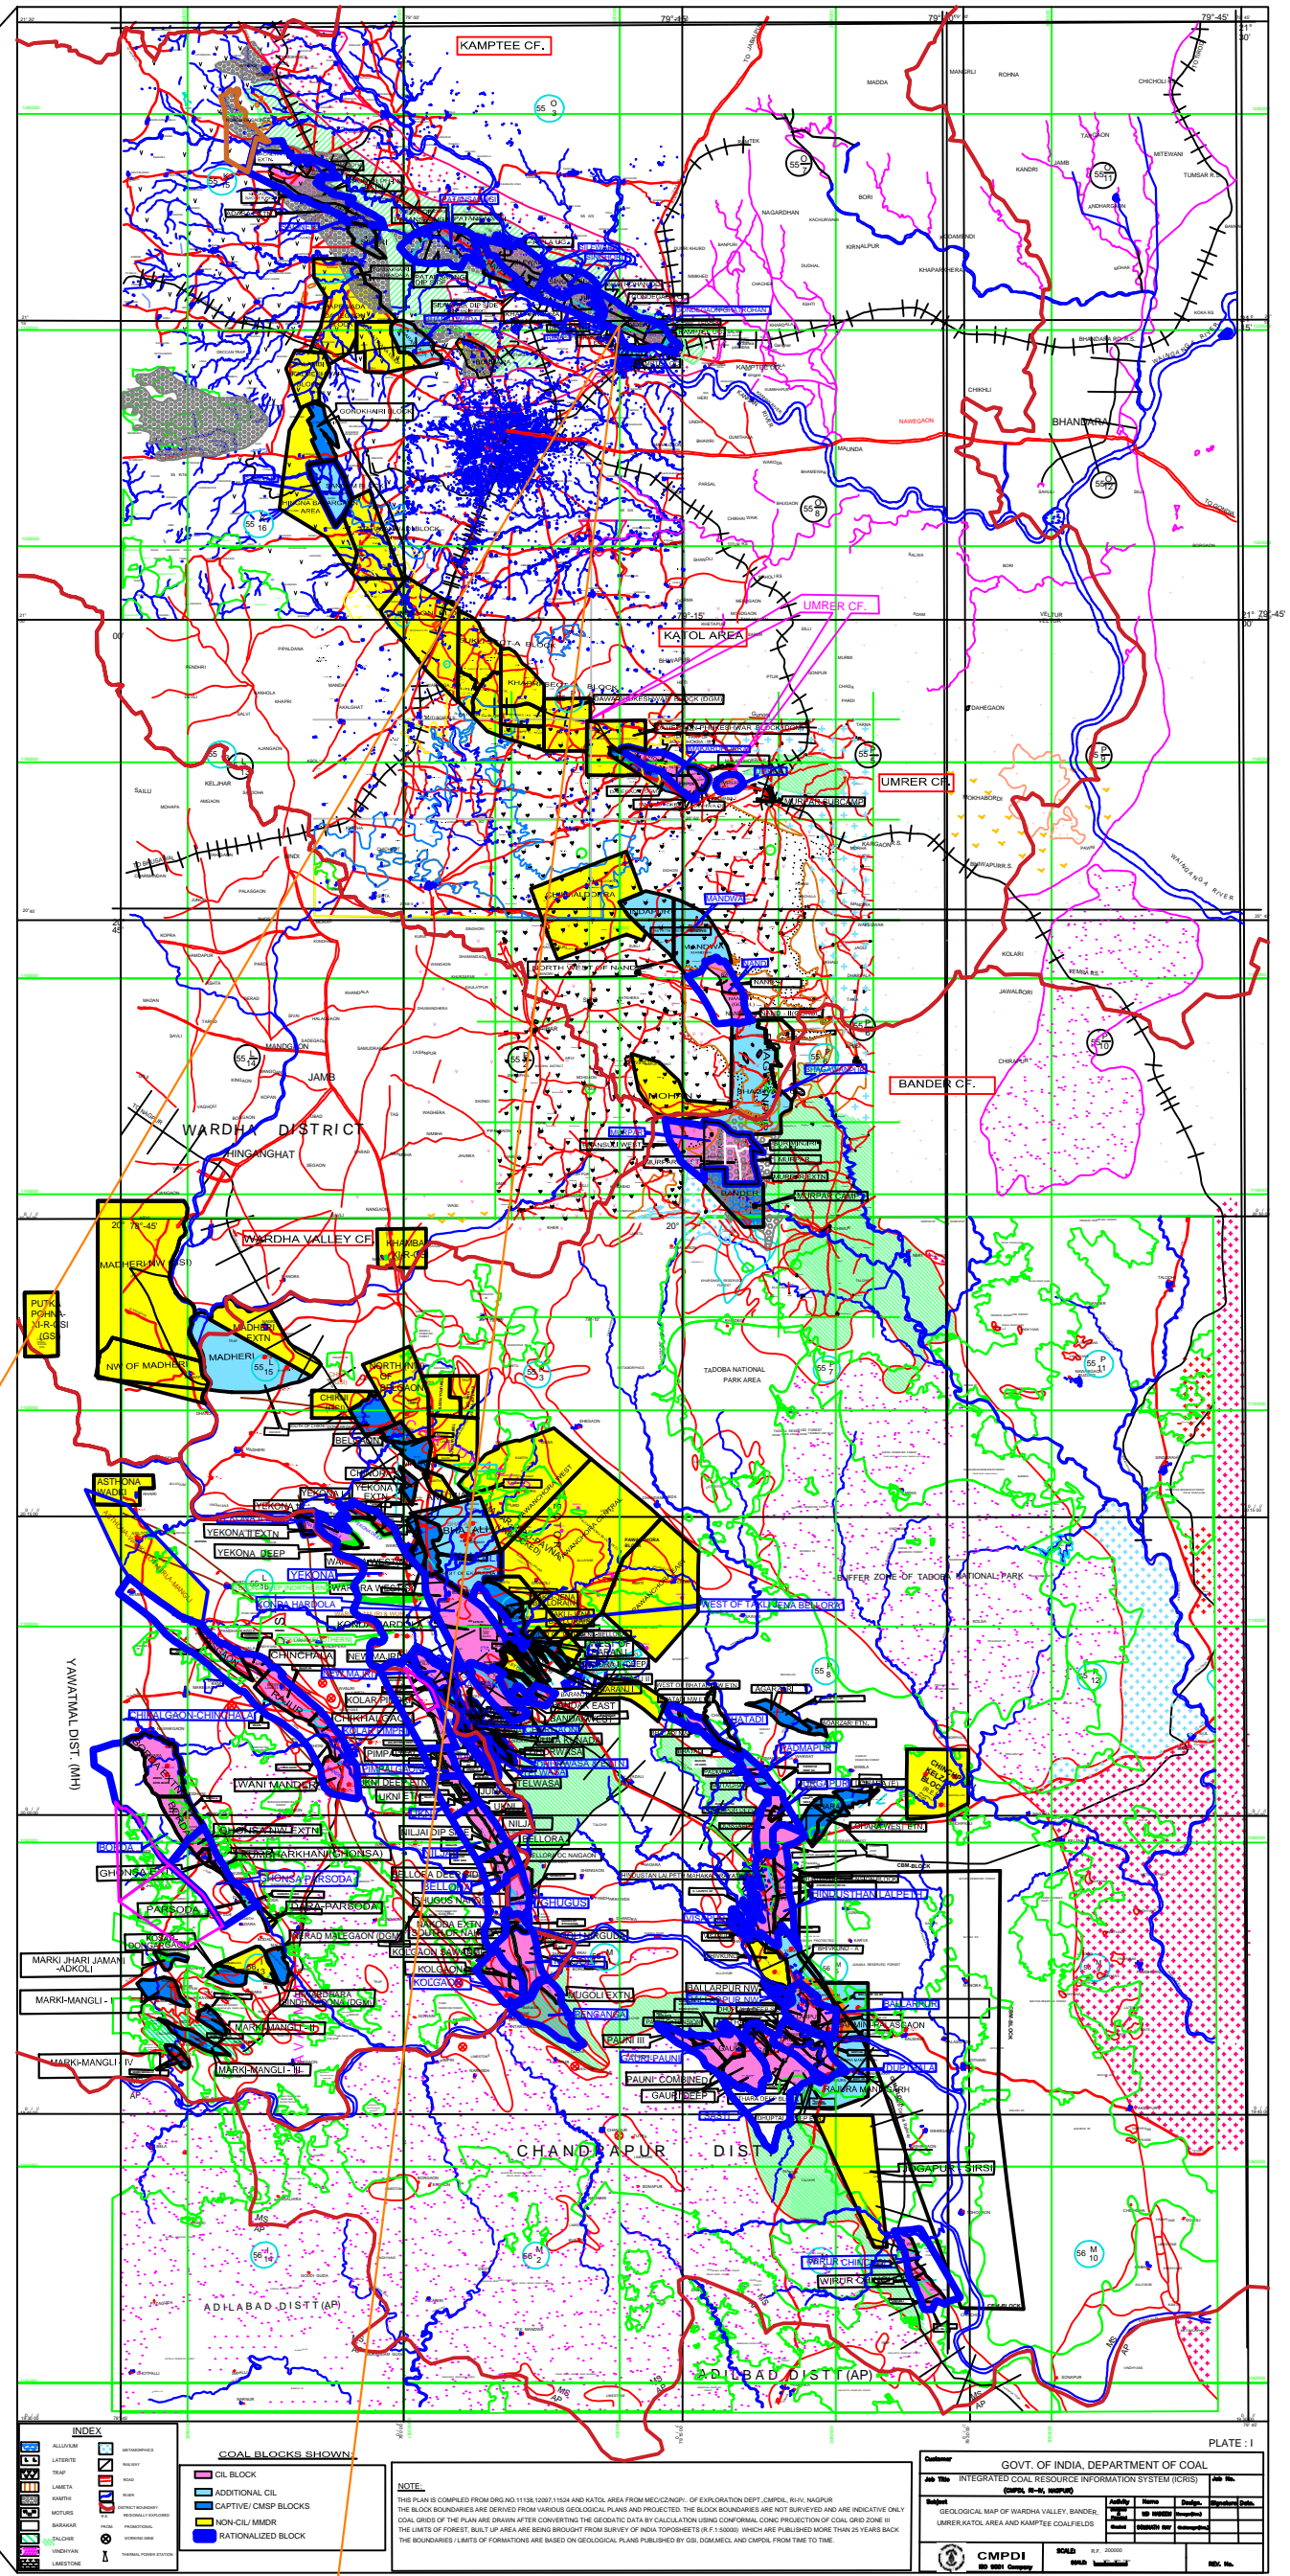

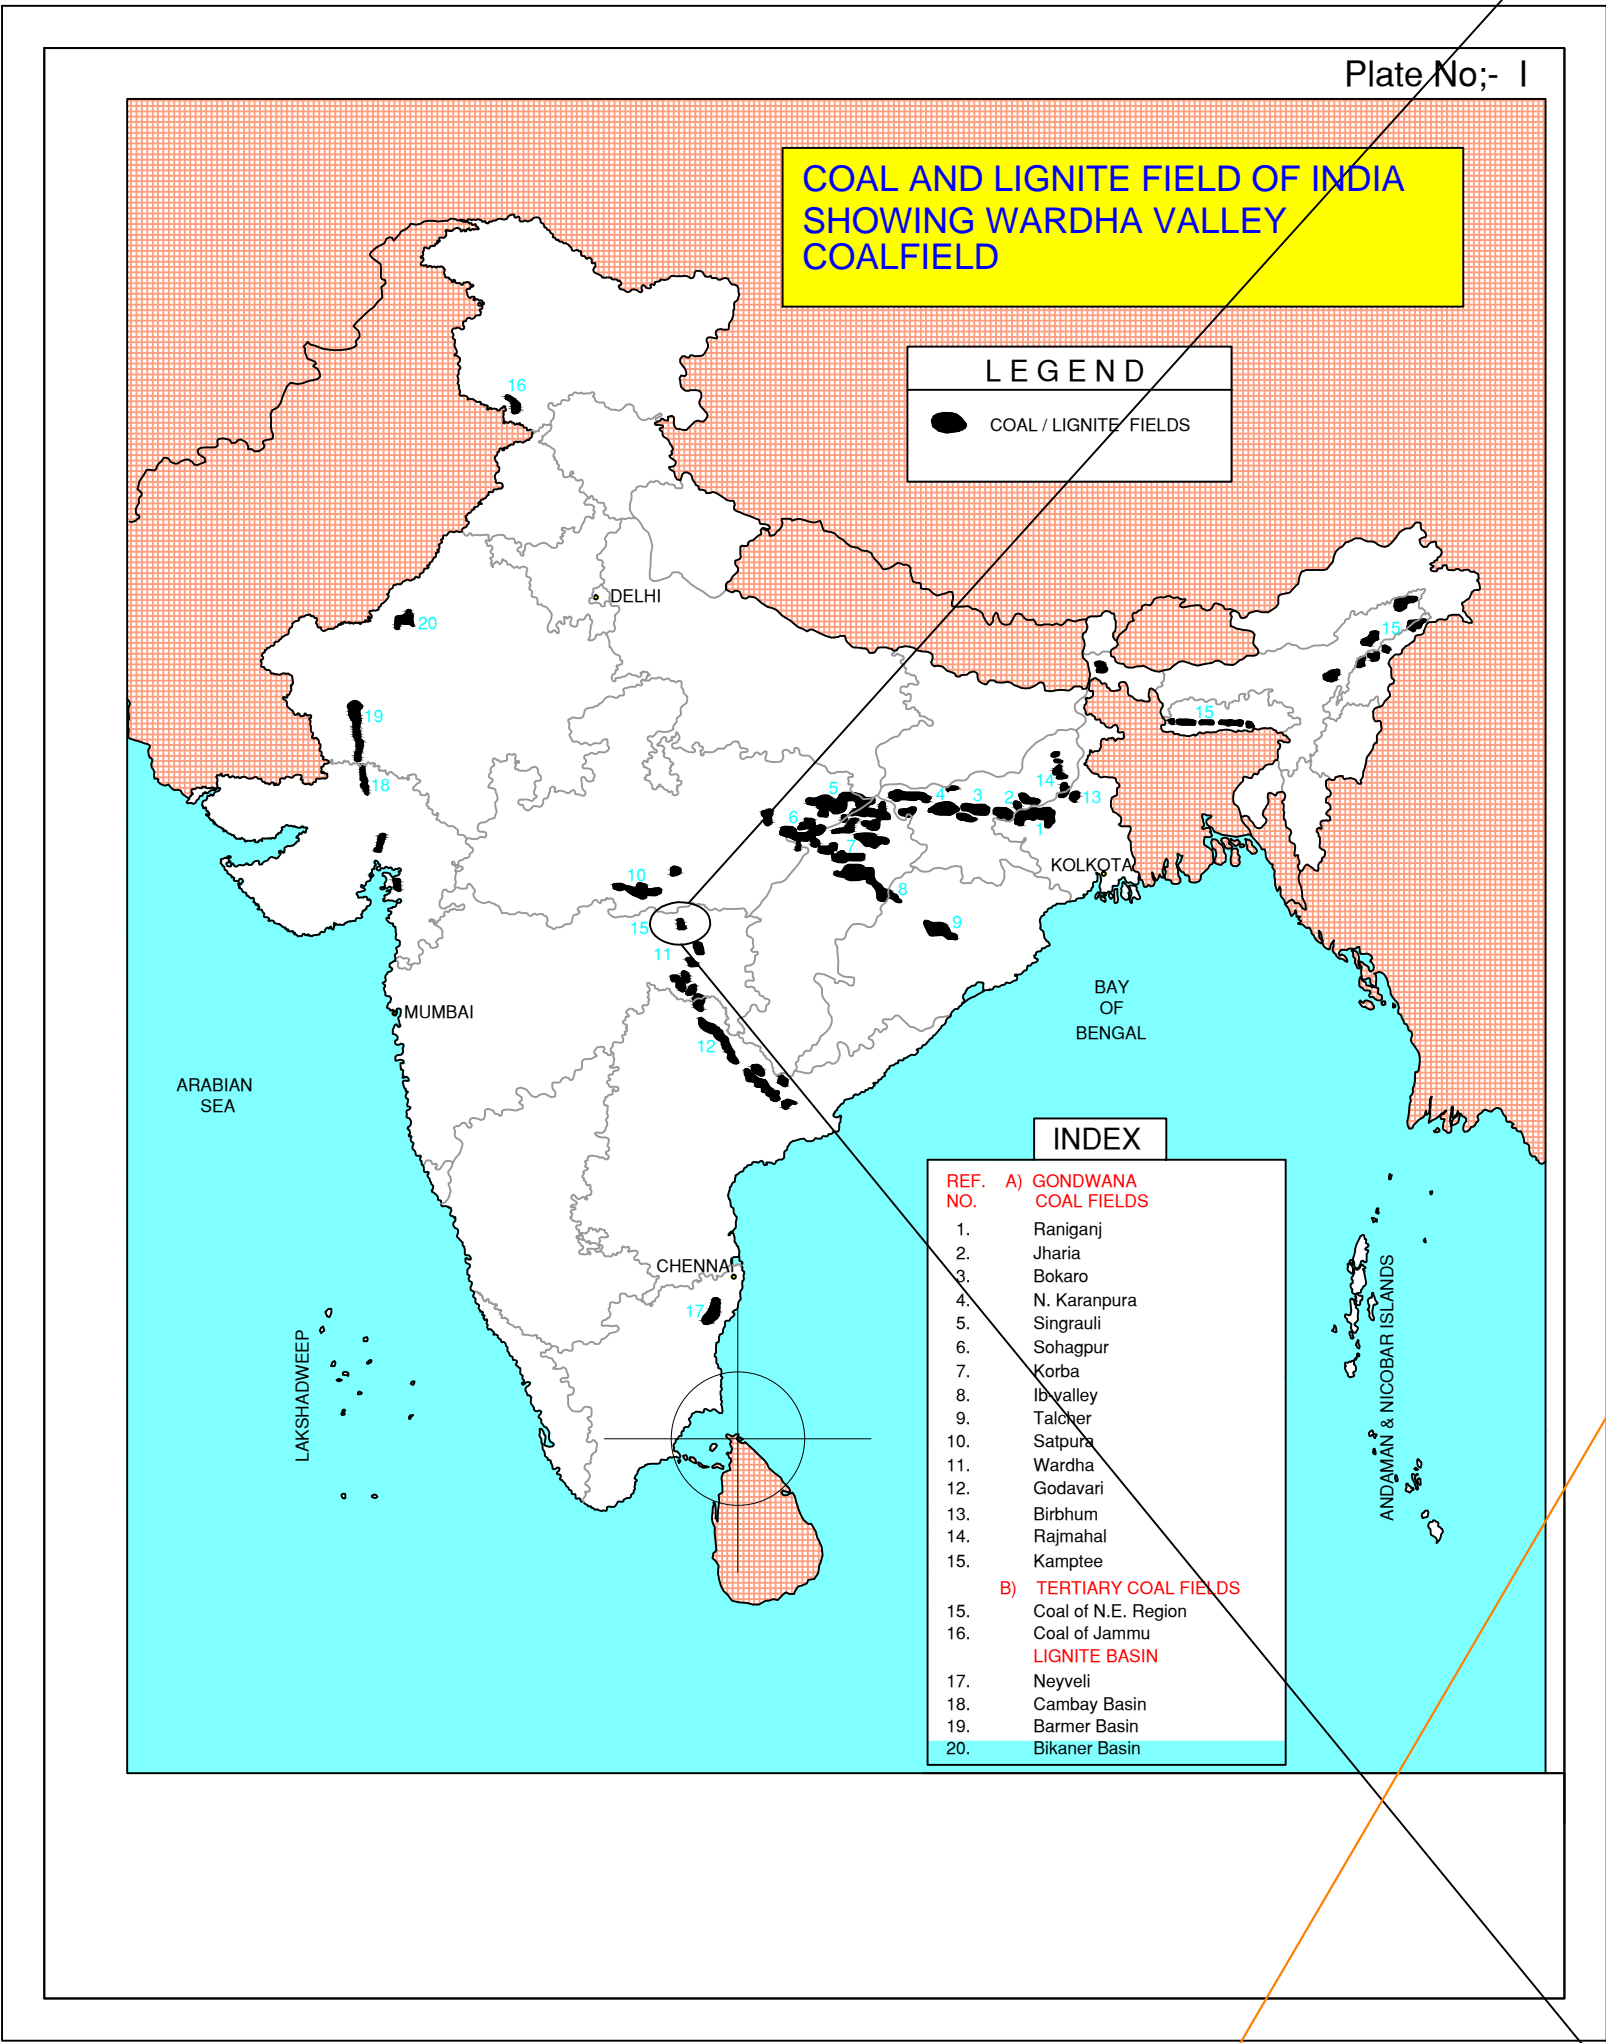

Exploration in the block is to be carried out as per Indian standard procedure for coal exploration and resource estimation. Considering tentative geological structure (Plate I) of proposed Block, total 27 boreholes have been proposed with the total quantum of 10500m of drilling including structure proving boreholes. Details of seismic survey proposed are given in detail in noting sheet.

The WGS84 coordinates as well as coal grid coordinates of each cardinal point of the block boundary are given in the following table:

(A) Since the structure is tentative, number of proposed borehole points may also vary as it depends upon the geological structure evolved during exploration. Moreover, as the proposed meterage is based on the tentative structure, actual meterage of proposed boreholes as well as total meterage may vary during exploration. All the details of proposed boreholes and data of boreholes falling within proposed block as presented in enclosed Annexures.

	3. FEW BOREHOLES MAY FALL IN HEAVE ZONE OF THE FAULT.				
	4. METERAGE OF PROPOSED BOREHOLES MAY ALSO VARY DUE TO CHANGE IN TREND AND THROW AMOUNT OF FAULTS. EXISTANCE OF ADDITIONAL FAULTS CANNOT BE RULED OUT.
