FOCUS ON INTERNATIONAL TRADE

U.S.A.

THE UNITED STATES OF AMERICA TODAY

| | <u>THE UNITED STATES OF AMERICA TODAY</u> |
|-------------------------|---|
| Location | The United States of America comprises mainly the North American continent |
| | between Canada and Mexico. Alaska, to the northwest of Canada, and Hawaii, |
| | in the central Pacific Ocean, are two of the 50 States of USA. |
| Size | The area of the USA is 9,826,629 sq. km. (3,794,083 sq. miles). |
| Geographic coordinates | 38° north of the Equator and 97° east of the Prime Meridian. |
| Geographic note | World's third-largest country by size (after Russia and Canada) and by |
| 5 | population (after China and India). |
| Land boundaries | Total: 12,034 km; border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km. Note: US Naval Base at Guantanamo Bay, Cuba is |
| | leased by the US and is part of Cuba; the base boundary is 28 km. |
| Land use | Arable land: 18.01%, permanent crops: 0.21% and other: 81.78% in 2005. |
| Irrigated land | 223,850 sq. km. |
| Elevation extremes | Lowest point: Death Valley –86 m. and highest point: Mount Mckinley 6,194 m. |
| Coastline | 19,924 km |
| Maritime claims | Territorial sea: 12 nm, contiguous zone: 24 nm exclusive economic zone: 200 nm continental shelf: not specified. |
| Population | 339,665,118 estimated for 2023. |
| Population Density | 34.33 (approx) per sq. km. |
| Population growth rate | 0.68% estimated for 2023. |
| Life expectancy | Total population: 80.75 years; male: 78.54 years and female: 82.93 years estimated for 2023. |
| Birth rate | 12.21 births/1,000 population estimated for 2023. |
| Death rate | 8.42 deaths/1,000 population estimated for 2023. |
| Net migration rate | 3.01 migrant(s)/1,000 population estimated for 2023. |
| Literacy | Total population: 99%; male: 99% and female: 99%. |
| Capital City | Washington DC |
| Other Large Cities | New York, Los Angeles, Chicago, Houston, Philadelphia, San Diego, Dallas, San Antonio, San Francisco, Jacksonville, Columbus OH, Austin, Baltimore, Memphis, Boston, El Paso, Seattle, Denver, Charlotte, Fort Worth, Portland, OR, Oklahoma City, New Orleans, Las Vegas, Cleveland, Kansas City, Atlanta, Minneapolis, Honolulu and Cincinnati etc. |
| Religion | Christianity is the predominant religion. According to the present available estimate there are Protestant 52%, Roman Catholic 24%, Mormon 2%, Jewish 1%, Muslim 1%, other 10% and none 10% in the country. |
| Language | The language is English, although there are significant Spanish-speaking minorities. Note: Hawaiian is an official language in the state of Hawaii. |
| Climate | There is considerable climatic variation, with mean annual average temperature ranging from 29°C (77°F) in Florida to -13.3°C (10°F) in Alaska. Average annual rainfall ranges from 1,831 mm (72.1 ins) in Arkansas to 191 mm (7.5 ins) in Nevada. Much of Texas, New Mexico, Arizona, Nevada and Utah is desert. |
| International Relations | The USA is a member of the UN, WTO, NATO, BIS, OECD, OSCE, OAS, Inter- American Development Bank, Asian Development Bank, Pacific Community, Colombo Plan, IOM and the Antarctic Treaty. |
| Internet domain | .us |
| International dialing | +1 |
| code | |
| Currency | The unit of currency is the US dollar (USD) of 100 cents. |

NATIONAL ECONOMY

The U.S. economy has proven resilient in the face of the significant policy tightening that took place in 2022. Consumer demand has held up particularly well, boosted initially by a drawdown of pentup savings and, more recently, by solid growth in real disposable incomes. Prime age labor force participation has risen above its pre-pandemic peak, the unemployment rate for women and African Americans has fallen to historical lows, and real wages have been rising faster than inflation since mid-2022. Nonetheless, the significant reduction during 2021 in the share of the population living in poverty has largely been unwound, as pandemic benefits have expired and real wage growth for low-income workers has moderated.

The strength of demand and in labor market outcomes has contributed to a persistent inflation problem. While goods inflation has moderated and shelter price growth is expected to slow in coming months, nominal wage increases are feeding into non-shelter services prices. Core and headline PCE inflation remain materially above the two percent target of the Federal Reserve.

Fiscal policy is expected to be procyclical in 2023 on a general government basis, following a significant fiscal contraction in 2022 due to the unwinding of major pandemic related fiscal measures and higher tax receipts. While the U.S. retains some fiscal space, public debt is well above pre-pandemic levels and is expected to continue to increase over the next decade, as aging-related expenditures on healthcare and social security feed into the debt dynamics.

Monetary policy has been assertively tightened. Interest rates have risen by 500bps since March 2022 and are expected to remain at or above the current level well into 2024. The process of shrinking the Federal Reserve's balance sheet is ongoing.

Recent bank failures reflect the challenge of sizable unrealized losses on assets in the rising interest rate environment, while substantial amounts of deposits remain uninsured. Blanket guarantees were extended to depositors at failed banks where the deposit franchise could not be sold. The Federal Reserve provided systemic liquidity support, including a new facility to reduce the need for banks to liquidate assets in times of stress. These actions have stabilized deposit outflows and restored confidence to the banking system.

Executive Board Assessment

In the course of Article IV consultation between IMF and USA, Executive Directors of IMF agreed with the thrust of the staff appraisal. They welcomed the continuing resilience of the U.S. economy in the face of the significant tightening of monetary and fiscal policies in 2022. Directors noted, however, that resilient demand and strong labor market outcomes have contributed to more persistent inflation. Going forward, bringing inflation down remains a priority. Efforts to tackle longer-term issues—including bringing down public debt, and addressing supply-side constraints and decarbonizing the economy while avoiding protectionism—also remain necessary.

Directors emphasized that bringing inflation back to target will require an extended period of high interest rates. Nevertheless, Directors also highlighted the potential risks to global activity and financial stability from a prolonged period of tight monetary policy, especially in light of recent bank failures, and careful monitoring will be necessary. Directors stressed the importance of clear communication of the Federal Reserve's assessment of incoming data and its implication for the path of the policy rate.

Directors recognized that in the short term, a tighter fiscal stance would ease some of the burden shouldered by the Federal Reserve in reducing demand and inflation. Over the medium term, more determined action will be needed to put public debt on a decisively downward path, including tax increases and tackling structural imbalances in social security and Medicare. Directors also called for a permanent solution to the debt ceiling.

Directors commended the authorities' prompt response to recent bank failures but observed that the bank failures illustrate the systemic risks posed by even relatively small financial institutions. Directors called for improved stress tests, more stringent requirements for mid-sized banks, including aligning capital and liquidity requirements with the Basel framework, and for a more assertive supervisory stance. Directors encouraged the authorities to address remaining FSAP recommendations. They welcomed their governance and anticorruption efforts in the financial sector, including plans to close gaps in the AML/CFT framework.

Directors noted that the U.S. external position remains moderately weaker than implied by medium-term fundamentals and desirable policies. Noting that "Made in America" policies in recent legislation include provisions that favor goods and services produced in the U.S. or North America, Directors urged the authorities to maintain open trade policies and work to strengthen a rules-based multilateral trading system. Directors welcomed the proposed supply-side policies including expanding access to healthcare and education and incentivizing labor force participation, but recommended that these policies be implemented in a manner that supports a downward path for public debt.

Directors welcomed the climate provisions in the Inflation Reduction Act as a means to decarbonize the U.S. economy. They noted that the U.S. climate goals could be achieved without introducing domestic content requirements. They also noted the need for additional efforts to ensure emission reductions reach the U.S. objective, which could include building consensus on carbon pricing. Training and financial support for the most affected workers would facilitate a faster reallocation of labor and lower societal costs of the transition.

"NATIONAL ECONOMY"M is based on IMF Executive Board Concludes 2023 Article IV Consultation with the United States June 15, 2023.

FOREIGN TRADE

The United State of America's total exports in 2018 was of the order of US\$ 1,665,303 million. It decreased to US\$ 2,062,090 million in 2022. Exports during the period from 2018 to 2022, in terms of percentage, grew highest (22.58%) in 2021 and fell maximum (-13.02) in 2020 in comparison with 2020 and 2019 respectively. The annual average compound growth rate worked out at 5.49%.

Imports, on the other hand, were of the order of US\$ 3,372,902 million in 2022 while in 2018 it was US\$ 2,611,432 million. Imports during the period from 2018 to 2022, in terms of percentage, grew highest (21.93%) in 2021 and fell maximum (-6.31%) in 2020 as compared to 2020 and 2019 respectively. The annual average compound growth rate worked out at 6.61%.

Volume of trade registered an annual average (compound) rate of growth of 6.17% from US\$ 4,276,735 million in 2018 to US\$ 5,434,992 million in 2022.

The USA faced a deficit balance of trade during the said period.

The USA's export and import, volume and balance of trade between 2018 and 2022 along with their growth rates are given in **Table-I**.

Principal import commodities of the USA are food and live animals, mineral fuels, lubricants etc., petroleum and petroleum products etc., chemicals and related products, basic manufactures, machinery and transport equipment, power-generating machinery and equipment, general industrial machinery, equipment and parts etc., office machine and automatic data processing machines, parts and accessories of office machines, telecommunication and sound equipment, other electrical machinery, apparatus etc., thermionic valves, tubes etc., passenger motor vehicles and clothing and accessories etc. and major export items are machinery specialized for particular industries, general industrial machinery, equipment and parts, automatic data processing machines and unites, electronic microcircuits, road vehicles, parts and accessories for cars, buses, lorries etc., other transport equipment, aircraft including spacecraft and associated equipment and parts, professional, scientific and controlling instruments etc.

The busiest airport is Atlanta (Hartsfield International). The second busiest is Chicago (O'Hare) followed by Los Angeles International. There are also the three busier airports in the world. New York (John F. Kennedy) is the busiest airport in the USA for international passenger enplanements, ahead of Los Angeles Internationals. The leading domestic routs are Los Angeles to/from New York, New York to/from Orlando and Chicago to/from New York.

The main airports in U.S.A. are: New York; Los Angeles; Miami; Chicago; New York (Newark); San Francisco; Honolulu; Atlanta; Houston; Washington DC; Dallas/Fort Worth; Boston; Guam; Detroit; Orlando; San Juan; Philadelphia; Minneapolis/St Paul; Seattle; New York (La Guardia) and so on.

The three largest ports in the USA, in terms of traffic handled, are the Port of South Louisiana, Houston and New York. Many other large ports serve each coast, 24 of them handling between 25m. and 89m. tons of traffic annually. The deepening of channels and locks on the St Lawrence—Great Lakes Waterway, allowing the passage of large ocean-going vessels, has increased the importance of the Great Lakes ports, of which the largest, Duluth-Superior, handled and average annual 40m. tons.

BILATERAL TRADE WITH INDIA

Indo-USA bilateral trade in 2018-19 was of the order of Rs.615,190.50 crores. It increased to Rs.1,033,693.55 crores in 2022-23. The annual compound growth rate of volume of trade during the period from 2018-19 to 2022-23 was 13.85%. India enjoyed a surplus balance of trade during the said period (**see table II**). The average annual compound growth rates of exports and imports worked out at 14.50% and 12.88% respectively.

India's exports to, and imports from the USA of Merchandised Goods during the period from 2018-19 to 2022-23 along with their growth rates are presented in **Table II.**

India's top ten merchandise goods exported to and imported from the USA during 2018-19 to 2022-23, along with their growth rates are depicted in **Table III & IV** respectively.
